Submit

They can also order food along making reservation:

If they click order, the ordering food will appear at the bottom

Manager can delete existed menu item or add new menu item:

Item Name:	Item price:
<input type="text" value="Item Name"/>	<input type="text" value="Item price"/>
ItemImageName:	Item type:
<input type="text" value="ImgName + .jpg etc"/>	<input type="text" value="Food"/>
Item description:	submit
<input type="text" value="Item description, like the ingredients"/>	

If the user input the invalid value, error will be throwed:

Reservation

Card Num

awsI.hestech.cn says
Creating reservation failed, some info is missing.

OK
